

Dear Education Committee,

I am strongly opposed to SB 1105. If we allow professionals other than Board Certified Behavior Analysts, Board Certified Assistant Behavior Analysts, or others who have ABA expertise within their scope and practice to provide ABA programming, our students will not only not learn, but will regress. This is not fair to our students with autism, who have the right to the best treatments and quality of life possible, as we strive to provide for *all* of our children.

Please do not pass this bill.

Sincerely,

Jill Castellani
